Hospital Quality Improvement Platform

How to Download Corrected SIERA Files from HCAI's SIERA Portal for upload into the Hospital Quality Improvement Platform

Background:

This is a step by step guide of how to pull down the corrected SIERA files from HCAI's SIERA portal. The HQI Team is aware many of the corrections are made in the SIERA portal and have been notified of a way to download these files to upload and participate in the <u>Hospital Quality Improvement Platform</u>.

Uploading the data that you have already corrected in the SIERA system will allow full analytic capabilities of your hospital's data in the HQIP platform, with the possible exception of readmission/ revisit metrics (because the SIERA download files return "Valid" or "Invalid" in the Social Security Number (SSN) field rather than the actual numbers you uploaded). To have same-site readmission/revisit metrics available in HQIP, you can upload Medical Record Numbers (MRN) or other unique patient identifiers for your encounters instead of Abstract Record Numbers (ARN) when you upload data into the SIERA portal. In cases where SSNs are missing, the HQIP platform will attempt to use the data in the SIERA ARN file to identify readmission/revisits to your hospital instead of SSN.

Contact us at <u>HQIAnalytics@hqinstitute.org</u> at any time and we'll guide you through the process.

Pulling Down a Custom Report:

- 1. Log into <u>HCAI's SIERA Portal</u>.
- 2. When logged in, you'll see a similar screen below. You'll be able to see the data that has already been reported to HCAI.
 - a. Please note the following:
 - i. You can filter it by the facility (if you manage multiple ones).
 - ii. You can filter it by Current/Active. We can use this function to view past quarters.

7. All the files will save in the following format: FacilityID-EndQuarterDate-SDE

Please save the file and add IP, ED, or AS at the end of the filename to help us distinguish the

files otherwise it will save over the previously downloaded data.

Example filenames:

- a. IP: 123456789_20220301_SDE_IP
- b. ED: 123456789_20220301_SDE_ED
- c. AS: 123456789_20220301_SDE_AS
- 8. After downloading all the corrected SIERA files, reach out to the HQI Team at HQIAnalytics@hqinstitute.org to set up an account in our <u>SFTP</u> to drop the file(s) in.
